
Keymacro automatically enables all keys on your keyboard. If you are on Xbox One, PlayStation 4 or Nintendo Switch, you will use your shoulder buttons to change characters. Overwolf's layout and operation remain identical to that of other operating systems, so that switching between keyboard and controller is a seamless process. With Keymacro you can play your favorite games with full control of every key Multi-platform support: Works for all major platforms: Xbox One, PS4, Nintendo Switch, Xbox 360, PS3, Windows and Mac. Built with user experience and ease-of-use in mind. Instant fire-up Every app in Overwolf is instantly installed in the game client, and whenever a game launches, the app is launched and automatically installed in the game client. Upon completing a match, your stats will be tallied up for your record of the match. Keymacro is a highly customizable keyboard and mouse program, with a diverse and customizable interface, you can control what each key of the keyboard does, when it is enabled, and what the key and macro combination is. You can even customize keymapping for use with specific games and gaming environments. Also included in the app are in-game macro and key commands, which are created by seasoned gamers for a quick and easy way to do things during gameplay.
