Internet is a gateway to the best source of information in the world. You can access any information and knowledge you want. One is tempted to use the Internet with the hopes of better understanding the World around. One can gain a better understanding through using Internet. Unfortunately, using Internet comes with certain risks, especially when one is underage. The many advantages of the Internet are overshadowed by the risks of breaching copyrights. Personal privacy is also endangered due to the prevalence of net scams and virus attacks. There are other risks also which many people are unaware of, such as: ☒ Fires - In case of any ISP-related Internet disruptions, Internet users can be affected. ☒ Eavesdropping - Internet users can be eavesdropped on by anybody. ☒ Identity Theft - Personal information can be stolen by identity thieves. ☒ Pornography - Internet users are exposed to pornography. ☒ Surfing at Risks - Because of the lack of protection, Internet users can be exposed to viruses, or their surfing can be at risk of getting breached by hackers or people that steal passwords. Privacy and security are very important on the Internet. The first step towards improving privacy and security is to be aware of how the Internet works, and how risks are involved. If you use Internet regularly, it is important that you set your privacy and security priorities. Privacy and Security on the Internet is a subject which many people are unaware of. A good site to start is [www.PrivacyAdviser.com](#). Home and School Internet Use - for Parents, Teachers and Students Description: Students and parents should be aware of the dangers of the Internet. There are many risks and dangers on the Internet which are hidden and which students and parents are unaware of. When a student uses the Internet, it is important that parents and teachers know about it. There are certain precautions that should be taken to protect the student and to ensure a safe Internet experience. The Internet can be very dangerous and parents should know about it. With the Internet, students can have access to information about anything and everything.

Because of this, there are numerous risks and dangers associated with using the Internet. Students should understand how to use the Internet safely and should not use the Internet when they are underage. For instance, some sites make students purchase items online. Students should not use the Internet if they are underage. If the parent does not know about this, there is a chance that the student will end up purchasing items
